

I. Overview

The quick start document is used to help new users get started with FineReport quickly.

II. Learning plan

New to FineReport, don't know how to learn?

Hierarchical coordinates thematic Learning Plan

Data entry thematic learning plan

Serial number	chapter	Subsection	learning target	Documentation tutorial
1	Product Introduction	Product Introduction	Understand FineReport product positioning, application scenarios, product advantages, product composition and function overview	An Introduction of FineReport
		Designer installation	Learn how to install FineReport designer under Windows system	Designer Installation
		Designer interface overview	Understand the function of each sub-panel of the FineReport designer interface	Designer Overview
2	First report	First report	Learn to use the designer to make the first simple ordinary report Understand the general process of using FineReport to make reports, and be familiar with the operation of the designer	The First Template
3	Basics of report property design	Cell expansion	Grasp the concept of cell expansion; learn to make line reports and cross reports	Cell expansion Row-based Report Cross Report
		Parent-child grid settings	Grasp the concept of Parent-child grid; learn to make grouped reports and free reports	Parent-child grid settings Grouped Report Free Report
		Hierarchical coordinates	Master the concept of hierarchical coordinates Learn to use level coordinates and common formula calculations: comparison, proportion, ring ratio, layer-by-layer accumulation, cross-layer accumulation and conditional summary	Hierarchical coordinates thematic Learning Plan
4	Design basis of	Master-sub report	Grasp the concept of the master-sub report; learn to make the	Master-sub report

	report function		master-sub report	
		Conditional attributes	Grasp the concept of conditional attributes; learn to use conditional attributes to achieve: interlaced color change, font highlighting	Conditional Attribute
		hyperlink	Master the concept of hyperlinks Learn to use hyperlinks to achieve: link reports, date sorting, report Excel export	Hyperlinks
5	Getting started with charts	Introduction to Charts	Understand the concept, type and production process of diagrams	Chart Introduction
		Examples of getting started with charts	Learn to use column and pie charts to insert cell element charts in reports	Cell Element Chart
6	Getting started with parameters	Introduction to Parameters	Understand the concepts, application scenarios, types and differences of parameters	Parameter Introduction
		Example of getting started with parameters	Learn to use template parameters and data set parameters to achieve report query results	Global and Template Parameter Dataset Parameter
		Parameters are empty select all	Understand the concept of empty selection of all parameters Learn to use template parameters and data set parameters to realize the method of empty selection of all parameters	The drop-down box parameter is empty select all
7	Getting started with data entry reports	Introduction to data entry reports	Understand the concepts, application scenarios, control types and production processes of data entry reports	Data Entry Introduction
		Data entry of row-based report	Learn to make a row-based data entry report	Row-based Data Entry
		Data entry of free reports	Learn to make a free data entry report	Customized Data Entry
8	Getting started with dashboards	Introduction to Dashboard	Understand the concept, application scenarios, advantages, component types and production process of dashboard	Dashboard Introduction
		Example of getting	Learn to make dashboard	Examples of getting

		started with Dashboard		started with decision reports
9	Decision – making platform	Introduction to decision–making platform	Understand the concept, interface overview and initial setting method of the decision–making platform	Introduction of Decision–making Platform
		Configure the external database	Understand why we need to configure an external database and how to configure it	Configure the External Database
		Example of a decision–making system mount report	Understand the process of mounting reports in the decision–making platform, and learn to use the decision–making system to mount reports	Add Content to Platform Directory
10	Server deployment	Tomcat server deployment	Understand the deployment principle and deployment process of the server Learn to use the deployment package and independent deployment to deploy the Tomcat server	Server Deployment Principles Server Deployment Package Independent Deployment
