

## Camino Node – KooGallery Guide

log into the machine and check if camino node docker container is running.

if it is not running, then run the following command:

```
docker run -d -v /home/camino-data:/root/.caminogo -p 9650:9650 -p 9651:9651  
--restart always c4tplatform/camino-node:latest ./camino-node --network-  
id=camino --http-host=0.0.0.0 --public-ip-resolution-service=ifconfigme --config-  
file=/root/.caminogo/configs/node.json
```
